Best Stretched Ceilings Provider – Italy
& Most Innovative Tensioned Ceiling Project: Dripping Chocolate Ceiling

TECNI *Decor*
soffitti tesi

TECNI DECOR soffitti tesi is a specialist stretched ceilings provider that creates unique solutions for its valued clients. We profile the firm to find out more about the innovative projects it crafts.

E

established in 2004, TECNI DECOR draws on the consolidated experience of its founder Luca Storani, who has been working in the interior finishing sector since 1990.

Today, the firm is a certified company in the distribution and installation of stretch ceilings, and it creates exclusive ceilings both on a national and international scale in various settings and sectors. The firm's clients include private houses, hotels, spas, wellness centres, schools, hospitals, shopping centres, and restaurants, and the company guarantees professionalism and serenity in compliance with the agreements undertaken.

This helps the firm to achieve its core goal: to always be able to satisfy, and, above all, surprise its customers. As such, the team at TECNI DECOR are constantly looking for innovative solutions to create unique, never banal or conventional environments with excellent products.

An example of success is this incredible designed ceiling made in the city of Recanati Mc where they have created for this ice cream parlor a stretched ceiling in the form of dripping chocolate. A sweet illusion of effect!

Internally, as a family-run business TECNI DÉCOR has a supportive and collaborative culture, and the team work closely together to ensure the success of every project they have the pleasure to undertake. This approach ensures excellence for the firm's clients, many of whom become firm friends with the team and work with them again and again on a variety of projects.

TECNI DECOR soffitti tesi is present on the National and International territory. To date they have collaborated closely and performed works in Italy, Kazakhstan, Germany, France, and Russia.

Looking to the future, TECNI DECOR has many exciting projects on the horizon, and the team is currently working on moving ceilings, with

clouds as well as underwater environments. The team is also keen to create remotely controlled scenes that will offer fantasy illusions on the ceiling. These projects will offer the firm many exciting opportunities to further enhance its already incredible portfolio of unique creations.
